See What Airtemp and Honeywell Can Do For Your Home And Comfort

When you think about home comfort, chances are you're just thinking about your thermostat or your heating and cooling system.

But TrueHOME comfort is more than just temperature. TrueHOME comfort is about maintaining the right amount of temperature, humidity, and clean, fresh air throughout every room in your home. Honeywell TrueHOME comfort solutions are designed to work together to ensure you get the most comfort for your money.

When it's time to get comfortable, select a Home Comfort Professional.

Recommending the right products for your home is only the first step. Our participating contractors are professionals trained to properly install, maintain and service the products they sell. Customer satisfaction is the reputation they build their business on and it's your assurance of peace of mind for years to come.

Honeywell

Comfort Solutions

Thermostats

Honeywell thermostats have long been the #1 choice of homeowners –because they're easy to use, easy to read and easy to program for optimal comfort and energy savings. World renowned reliability and precision accuracy means you'll enjoy the convenience, energy savings and consistent comfort for years to come.

Honeywell programmable thermostats can help cut heating and cooling costs by as much as 33% if used as directed. Savings may vary depending on geographic region and usage.

Choose from a full line of programmable thermostats to meet the needs of every lifestyle and budget.

Get Connected Option - Honeywell RedLINK and WiFi Enabled Systems

Stay connected. Honeywell Wi-Fi programmable thermostats give you remote access through a smartphone, tablet or computer to monitor and manage the temperature in your home. RedLINK keeps you connected, too, plus integrating humidification, dehumidification and ventilation. Honeywell Wi-Fi and RedLINK keep you connected to your home's indoor comfort system wherever you go.

Airtemp™
COOLING & HEATING SYSTEMS

Quality • Reliability • Value

Whole-House Humidifiers

Your home is a lot like your body –it needs to stay properly hydrated in order to protect what's inside and maintain the comfort of those living in it. Air that's too dry can soak up moisture from everyone and everything in your home, potentially damaging woodwork, wood floors, furniture and even paintings and artwork. Dry air takes its toll on us, too. Cracked skin, chapped lips, dry nasal passages and annoying static shocks are only some of the discomforting dry air symptoms.

When installed in your home's heating and cooling system, a Honeywell TrueEASE or TrueSTEAM humidifier works to automatically maintain a proper humidity level throughout the entire home. In addition to eliminating dry, stuffy air, it can also help reduce heating bills. Because humidified air feels warmer, you'll be able to cut energy costs by turning your thermostat down while still feeling comfortable.

Dehumidification

Too much humidity in the home can make it feel damp, sticky and downright uncomfortable. Plus, it can cause musty odors, unhealthy mold and mildew, and even damage wooden and painted surfaces which can lead to costly renovations. Overall, too much moisture in the home leads to personal discomfort and poor air quality.

A Honeywell TrueDRY dehumidification system operates quietly and efficiently to remove excess moisture while delivering fresh, filtered air into the home. In addition to improving indoor air quality, TrueDRY can help to reduce high cooling bills. Air with less humidity feels cooler, so you'll be able to turn your thermostat up and reduce your air conditioner's running time.

Honeywell TrueDRY dehumidification systems improve overall comfort and the health of your family and your home.
